

Designing your marquee layout is usually based on eight people seated at 5' round tables, or ten people seated at 6' round tables. Remember to give yourself additional space for a bar area, dance-floor, buffet area (if needed), and an arrival point. If you call us with your guest numbers, we can suggest a suitable marquee size.

The marquees are available in a selection of different widths and lengths, and are all modular, so can be combined to create exactly the venue size and shape you want for your event. The finished structure is completed with flat gable ends - perfect for maximizing space, and can be fully lined to create a softer feel to the inside and are ideal for wedding receptions.

Some of our sample layouts are shown below, but these really are just a starting point for you. We will work with you to design the layout of your choice which best suits your needs on the day:

### Sample Marquee Layout for 100 guests

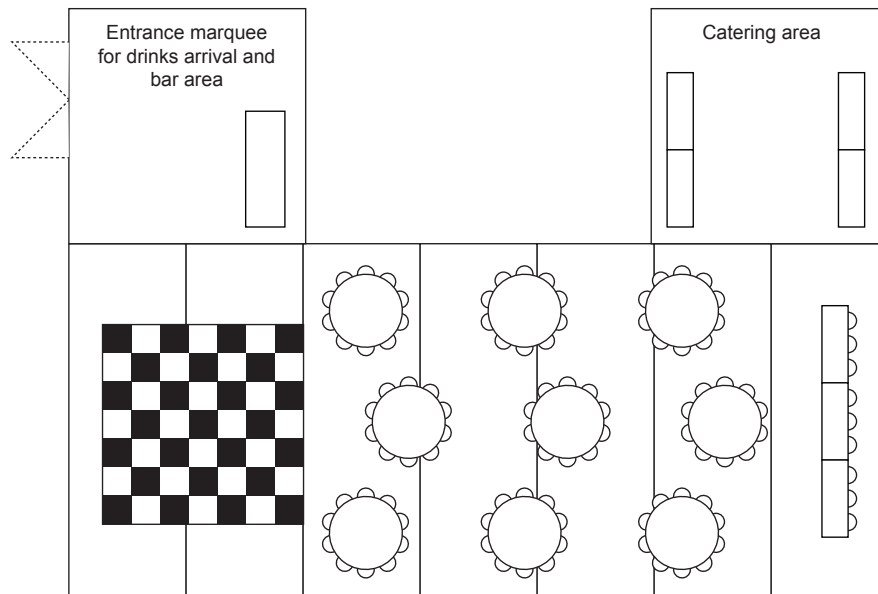

9m x 18m marquee Trestle table seating, straight traditional top table, 3m x 3m black and white dance floor, single bar unit, one set of doors:

## Sample Marquee Layout for 100 - 150 guests

As you can see by using round tables you can gain a lot more room, and by having additional Structures for the the catering and Entrance/Bar Area it helps separate the different areas and doesn't make the main structure seen "busy"

In this example there are only 9 round tables with 10 guests on each but you can easily fit enough tables in whilst still having room for the dance floor area
